# User Test Script

## Manage favourite bill

- Welcome, Mrs Amali I am going to ask some questions from you about the user interfaces of the app. Are you ready?  
Yes, I am ready.
- What do you think about the add favourite biller ui? How is the labels, texts input fields, buttons in the ui?  
It is pretty much good than before. Can we go to step 2 by clicking step 2 button?
- Yes, you can use step 1 and step 2 buttons to move between these 2 Also you can go to step 2 using next button.  
Ok. Its good. But it is better to make next button text to white colour and make step 1 button little bit dark. Then it will be more visible.
- Ok. I got it. I will describe the manage favourite bills page. This is showed the list of bills with the biller details. You can edit or delete a biller using these 2 buttons. So do you see anything that need to be improved in this user interface? If so what need to be improved?

There are only 2 billers at one-time user as I can see. So I think it is better to reduce the size of the card. Then it can show more than 2 billers on the screen.

- Ok. What do you think about the edit favourite bill ui and updated, delete notification messages?  
I think no improvement needs to be made. The notification is big enough. So anyone can see it well.

## Credit card Service

- What do think about the credit card service ui? Is it clear enough?  
Yeah its very simple and clear ui. There are no many elements in the screen. The elements have been placed well.
- At the last considering all user interfaces, do you have any suggestion?  
Overall the uis are good. I suggest to use few colours without using many colours for elements. I think its good to use app title colour for other elements. Then it will be like a modern apps ui.
- Ok, Mrs Amali thank you for your contribution for this feedback session.

## One Time Bill Payment and Account Summary

I will be asking some questions concerning the One time Bill payment and Account summary UI.

- At a glance what can you say about the user interface for Onetime bill payment?

Yes, it's a very simple UI and I like the design. And it lets me focus on the necessary details at a glance so it's very convenient.

- So other than that, is there any other feedback you'd like to give us, perhaps on the functionality of the UI?

Well yes, I think it's not necessary to ask the user whether to send the OTP via email/SNS. Since everyone is using their mobile phones it will make sense to use SMS only. Also I think enabling downloadable receipts for every transaction would cost a lot of storage space. So making the user choose whether to download a receipt would be more convenient.

- What do u think about the user interfaces with regard to how the elements are placed and the colours used?

Well, I very much like the design and how the elements are placed. And I like how we can view the transaction history as well for a particular account.

- Do u have any feedback or suggestions the details presented to the users through the interface?

Yes, maybe adding the Account No with the account holder's name would be ideal for the transaction history.

## User Authentication

Hi , Dimuthu , from this session we are hoping to test the usability of our banking application. To do that I'll ask you to do some task in our mobile application, and after completing a task please feel free to give your feedback. Shall we start?

- Now think you are new user to the app, so first you must sign up, so please do sign up?

yes sure.

- so how do you feel about sign-up interfaces and process?

I feel like its ok.

- what do you think about the sign-up forms, is it ok or need to change?

I Think its nice if input field border color goes with app theme color.

- now you have to login to the app, so what do you think about the login form?

its ok, easy to understand.

- login navigate you to the menu page, what do you think about menu button, that colors are ok or need to change?

I think that different colors for button does not match, I think it's good that icon colors go with theme color.

- ok, now think you forgot your password, so now can you go through the forgotten password process?  
Yes, Sure.
- so what do you think about forgotten password UIs?  
I feel like its ok, & easy to understand.

### **Manage Favorite Beneficiary**

Ok, Dimuthu now let's move on to the manage beneficiary function .

Ok, as the first task let's check whether you can find the manage beneficiary page . --- User finds the manage Beneficiary page –

- Was it easy to find the page ? what do you think about the flow ?  
Yeah , it was pretty straight forward , I think there is nothing to improve in the flow .
- What do you think about the user interfaces ?  
Mm , I think there pretty good , but I would suggest you to change the colors of these menu items . I think it is better to use combination of red and white rather than red an yellow ,
- Ok , thankyou for that suggestion , let's move to the next part . Can you go and a new beneficiary? ---- User adds a new beneficiary ----
- Ok , what do you think about the process and the UI ? do you have any suggestions .  
Yeah, I think I have some suggestions. - As the first thing, like i said previously you can change the color of these description box to red and white. - And next thing is, it was difficult for me to find the step that I was in the form, I think It is better to implement a progress bar on top of form which can highlight steps of the form. - And also you can add rounded corners to input fields , then that will get a modern look .
- Ok, lets check update and delete process . --- User check update and delete process ---
- What did you feel about the update and delete process .  
I think it is pretty good there is nothing to improve there

Thank you

A screenshot of the People's Bank mobile app. At the top, there is a yellow header with the bank's logo on the left and the text "PEOPLE'S BANK" in red on the right. Below the header is a dark red navigation bar with a white left-pointing arrow and the text "Manage Favorite Bills" in white. The main content area has a light gray background. In the center, there is a dark red circle containing a white checkmark. Below this, the text "Favorite Biller has been updated successfully" is displayed in black. At the bottom center, there is a dark red rectangular button with the word "CLOSE" in white capital letters.

The screenshot displays the 'Account Summary' section of the PEOPLE'S BANK mobile application. At the top, there is a navigation bar with a hamburger menu icon on the left and the bank's logo and name, 'PEOPLE'S BANK', on the right. Below the navigation bar, the title 'Account Summary' is centered. The main content area features three account cards. The first card is for a 'SAVINGS ACCOUNT' (indicated by an upward arrow icon) with a 'Personal' account type, account number '1234-667-23878', and a balance of 'LKR 474,035.00'. The second card is for a 'CURRENT ACCOUNT' (indicated by an upward arrow icon) with a 'Business' account type, account number '1234-667-23878', and a balance of 'LKR 275,000.00'. Both cards show the branch as 'Bandaragama' and include a bar chart icon. The third card, 'FIXED DEPOSITS', is partially visible at the bottom with a downward arrow icon. The app's interface uses a color scheme of dark blue, light blue, and white.
